

WHERE IS OUR PAY RISE?

Another pay rise for MPs and nothing, yet again, for frontline NHS staff. In response to the government's decision not to reward us for our sacrifices during this ongoing pandemic, 90,000+ NHS staff have joined our Facebook group and are taking actions across the country to demand the government pay us what we are worth. We are demanding a 15% pay rise for all NHS staff.

We had a 20% pay cut over the last decade, as inflation has reduced the value of our wages. The pay deal agreed in 2018 did little to address this and 1.65% pay rise in 2020 isn't worth all that we suffered this year! There are over 100,000 vacant NHS posts, forcing the rest of us to struggle with huge workloads. A pay rise would help the NHS recruit more staff, and provide a better service for our patients and create a safer community. Join us in demanding a 15% Pay Rise Today!

HOW WE WIN

- Join Nurses United**
We're a campaigning organisation of frontline nurses who have said Enough is Enough! but we can't win without you joining and getting involved. Not a nurse, become a supporter and get involved.
- Get involved locally**
Our structure is focused on the local, letting you get more involved with running local events and actions, and helping to shape how campaigns are delivered in your local area.
- Sign up for trainings**
We offer numerous trainings from "How to Organise" to "How to talk to the Media" and so much more!
